

Oilmax

SCRAP / SWARF COMPACTOR

Triple Action Fully Automatic

[Presentation](#)

[Spiral Swarf](#)

[Sheet Metal](#)

[Packing Mat](#)

[Waste Utensil](#)

[Aluminium Foil](#)

This cutting-edge machine is designed to revolutionize your scrap management process by reducing scrap volume, optimizing space utilization & ultimately lowering scrap handling costs.

Ideal for a variety of materials including machining turning swarf, aluminium scrap, sheet metal scrap, paper waste, wires, waste plastic, and packing materials, our Scrap Compactor is a versatile solution for your waste management needs. Say goodbye to inefficient scrap handling & welcome more streamlined & cost-effective approach with our state-of-the-art compactor.

Features & Benefits

Before

After

- Rugged design with high compaction force with high compaction force
- Safety interlock for door and overload protection for motor
- Automatic hydraulic operation with powerful stroke
- Great reduction in scrap volume
- Better space utilization & scrap management
- Substantial reduction in scrap handling cost

One Time Installation, Lifelong Saving

Installations

Oilmax

Specifications

Particular	Details
Model	HSC300-70
Baling Chamber Filter (Inch) (LxWxH)	35"x25"x16"
Final Bale Size (Inch) (LxWxH)	16"x8"x8"
Hydraulic Cylinder Force	70
Electric Motor	10HP, 3 Phase, 415V
Cycle Time	55 - 60 Sec.
